THE E³UDRES² HACKATHON

THE HACKATHON

At the 2nd E³UDRES² Hackathon, we are looking for answers to 6 European-level challenges with international teams. During the hackathon, you develop an idea for the challenge of your choice, which you present in the form of a pitch to a jury of renowned experts.

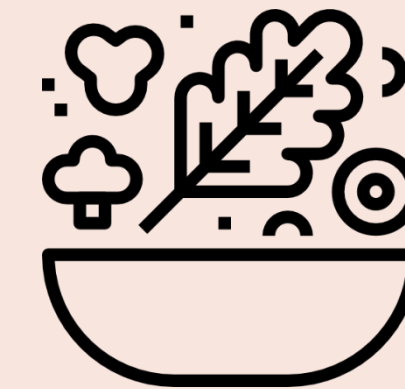

At registration, you have to select a challenge, and you will be organized in a team with students with the same interest.

You will meet some of your team mates at the University hub and with some of them online.

You will have 36 hours to develop your solution (a project plan, a prototype idea, etc.) with the help of your challenge owner and mentor.

MANY CHALLENGES AWAIT!
