

TOM NIJSEN

TITLE	Energy inspirator, UCLL
BIOGRAPHY	<p>Energy is all around us, but how do we control it? I have built up a lot of practical experience that I could share with you.</p> <p>My home lab serves to inspire others about sustainable technology. Solar panels since 2007, smart energy control since 2014, a home battery since 2016, a smartly charged electric shared car since 2019 and an offgrid solar carport from 2021.</p> <p>I eat challenges about renewable energy production, storage (with and without wheels) and smart monitoring and steering for breakfast. My purpose is to inspire people to participate in the sustainable energy transition!</p>
SKILLS AND EXPERTISE	<ul style="list-style-type: none">• Energy systems/solutions• Data challenges/definition• Programming use case scenario's• Testing prototypes
